

### Pre-LIGNA 2023 Tour

A group of predominantly Kiwi wood-processors visited Estonia and Poland on Weinig's pre-Ligna Technology Tour of high-tech timber processing operations.

Starting in Tallin, Estonia, the tour visited a variety of highly-automated operations. With lots of inspiring technology and productivity on show there were plenty of spirited discussions on both the bus and while enjoying the local cuisine and craft beer.

The final factory visited was [Sungarden](#) – a highlight for many on the tour, and featuring a fully automated Weinig line to make bed components.

If you're interested in our next high-tech timber Tour, please [let us know](#).

### Product Focus: Weinig's Profimat 50

Weinig's renowned quality is more affordable than you might think.

- Flexible setup & profile change via Memory plus touch screen control panel & digital displays
- Easy program saving, recall and automatic adjustment of width and thickness to a set value
- Excellent surface finish and simple to use
- Robust machine infeed, 1 driven serrated roller in table and 2 driven rollers above the table
- Six head, wide version, working width 260mm, height 160mm

For over 70 years, Weiss Holzwerk been producing wooden packaging, crates and pallets, sawn timber and carpentry of the highest quality. Two years ago they opted for a 5-head Weinig Profimat 50, in wide version, to produce strips, scantlings boards and facades.

## [Weinig Dimter Packaging Days](#) 19 – 21 September, 2023

Weinig Dimter's Packaging Days will present everything around the manufacturing of wooden packaging products and pallets.

Scanning, cutting, and gluing, live demonstration of high-performance cross-cut system with automatic destacking unit and automatic stacking machine.

If you are in Europe this month, this would be an excellent opportunity to let the Weinig Group introduce you to the latest solutions for the packaging and pallet manufacturer.

## Staff news: Jack joins Jacks

We'd like to introduce one of our new Service Technicians – Jack Simkin.

Jack joins us from England where he's been working for Weinig UK for the past two years. Before working at Weinig he was a workshop engineer, repairing and rebuilding woodworking machinery of all brands.

Jack has already been introduced to a few Kiwi workshops, including the installation of a Dimter S90 Speed. He's also been getting familiar with the differences between Kiwi and UK timber processors.

We're delighted Jack has moved to New Zealand. Given his appreciation of the Auckland weather in what must be the worst year for decades, we're confident he's going to enjoy the Kiwi lifestyle!

**Jacks Service & Spares: call 0800 522 577**

**To discuss your machinery requirements please get in touch:  
Neil Dodunski – 027 563 0679 or Brian Stevenson – 027 307 7635**
