

Virutex MEB ZeroLine® Table-

Table with extendable front guide for total stability in stationary use, allows for simple transformation of the PEB ZeroLine® portable edgebander into a stationary edgebander. This enables the benefits of both gluing systems: portable and stationary.

The large table surface enhances the possibilities and applications, such as edgebanding panels of different types.

Equipped with a roll holder and a pedal-activated device for rear edge cutting.

The MEB ZeroLine® includes two SVN250 DUO vacuum clamping systems. With these, you can securely fix panels and perform profiling with our FR156N Edge Trimmer.
