

Mafell ZH320Ec Carpentry Planer-

The Mafell ZH 320Ec is considered by most timber framers to be the finest wide format planer in the world. This 32cm planer is very lightweight at only 14kg, and extremely powerful. It has excellent sliding properties, even with moist timbers, due to special base-plate structure, and it even offers a new enhanced air duct for excellent chip removal.

As with most Mafell machines, the intelligent control electronics keep watch in the background to ensure smooth start-up and constant speed under load, and speed reduction to protect the machine without load and overload protection. After switching off, the highly efficient tool brake stops the cutter head in seconds for added safety.

The ZH 320Ec features guide rollers for maximum utilisation of the planing width, and easy-to-change Reversible Blades for high productivity planing.
