

Mafell Mafell BST460S Drilling Station-

mafell

Mafell's new line of drilling stations are brilliantly engineered and constructed with the highest quality materials for a superior drilling experience. Using a lightweight but rigid single aluminum column and continually adjustable iris-like guide rollers, these drill guides offer unprecedented accuracy.

The "S" versions can be precisely set to +/- 45° and an innovative template accessory system enables the user to produce highly accurate series of patterned holes. Notches in the base plate enable easy alignment to a marked location and a parallel fence is available for end grain drilling or to reference drill from the edge of a timber.

Mafell drill stands include top and bottom stops, as well as an adjustable tensioning cable which effortlessly returns the drill to its starting position.
