

Tormek AX-40 Axe Jig-

The AJ-40 Axe Jig lets you sharpen all types of axes with maximum precision. It is very easy to use - just flip it over to sharpen the other bevel to a symmetrical result.

The heavy duty composite jaws that secure your axe has two stops for sharpening axe heads of various sizes and shapes. By letting the jig slide on the universal support between the two stops you can sharpen a convex bevel which is preferable for certain applications.

The versatility of this jig makes it the ideal solution for sharpening carving axes as well as carpenter's axes, outdoor hatchets and more. One jig for all axeheads!

Why AX-40 Axe Jig?

- Sharpen all types of axes.
- Sharpen a concave or a convex bevel.
- Sharpen a flat bevel on the side of a diamond grinding wheel.
- Easy to use and get high precision results.
- Fits Tormek T-8, Tormek T-4, and older models with universal support
